Summary

Sales operations specialist who turns ambiguous business problems into shipped software. 3+ years at Nokia: headcount reporting and forecasting for a 3,000–4,000-person organization, then sales reporting for 150+ users and a quarterly executive reporting app used by 80+ stakeholders across 7 regions. Co-Founder & CTO of A Darle 20, a live two-sided marketplace with 1,400+ users and 2,100+ bookings, architected and shipped solo with an AI-agent-heavy development workflow (Claude Code). Looking for a revenue operations or delivery operations role at an AI-forward company.

Experience

Nokia Toronto, ON
Sales operations specialist (internal tools & automation) Jun 2024 – Present

- Built a self-serve Power App used by 80+ stakeholders across 7 regions for quarterly executive reporting — eliminating a manual collection process that consumed one finance analyst's entire workday, every day of quarter-end close.
- Migrated all sales reporting from Salesforce Analytics to Power BI for 150+ users — owned data modeling, transformation logic (SQL/DAX), and the global stakeholder rollout end-to-end.
- Own every tool through its full lifecycle — translating vague requests from sales and finance leadership into scoped requirements, then executive demos, global rollout, user support, and rapid iteration across time zones.

Workforce management specialist Oct 2022 – Jun 2024

- Owned headcount reporting and forecasting for a 3,000–4,000-person organization.
- Identified $1.2M in real-estate cost savings by analyzing lab and facility utilization data.

A Darle 20 (“Let’s Go 20”) — adarle20.com Toronto, ON
Co-Founder & CTO (solo developer) Aug 2025 – Present · launched Mar 2026

- Architected and shipped the entire marketplace as solo developer — TypeScript, Next.js, Supabase/PostgreSQL, Stripe Connect, Vercel — running an AI-agent-heavy development workflow (Claude Code), with hands-on ownership of architecture, code review, and release.
- Grew to 1,400+ registered users, 127 hosts, and 2,100+ bookings in the first four months post-launch, with 200–400 unique visitors daily.
- Instrumented the funnel end-to-end — bookings, conversion, cancellations, refunds, host activation — and use the data to steer product and monetization decisions.
- Built the technology behind a flagship 251-player event at a 19,000-attendee convention, rated 4.96/5 by attendees.
- Integrated Stripe Connect for host payouts, platform fees, and OXXO cash payments — solution-designing payment flows around a low-card-penetration Mexican customer base, with automated refunds and transactional email.
- Run an autonomous multi-agent code-audit workflow (Claude Code) that reviews, refactors, and regression-tests the production codebase.

Freelance web development & consulting Remote
Self-employed May 2019 – Oct 2022

- Advised a startup client on web-development strategy, saving $100k+ in agency fees.
- Built custom client solutions — an integrated web ordering experience and an affiliate-marketing site.
- Resolved a client security breach and restored their domains from email blacklists.

Dell Technologies Austin, TX
Marketing intern May 2018 – Aug 2018

- Built a propensity model (Azure ML) on Dell's historical customer database to identify cross-sell targets for a high-margin software product — surfaced ~20,000 qualified accounts representing an estimated $129M pipeline (segment-level average deal size).

Education

B.S. in Business Administration — The University of Texas at Dallas 2016 – 2019
Software Engineering Immersive — General Assembly, Toronto 2020 – 2021

Technical skills

GTM systems & analytics: Salesforce, Power BI, DAX, Power Apps / Power Automate, SharePoint, Excel/VBA, forecasting
AI & automation: LLM integration & agentic workflows (Claude Code, Anthropic API), prompt engineering, Python automation
Engineering: TypeScript, React, Next.js, Node.js, Python, SQL, PostgreSQL, Supabase, Stripe, REST APIs, ETL & data workflows
