# SIDHANT MATHUR

Toronto, ON | 613-795-9684 | hello@sidhantmathur.com | linkedin.com/in/sidhantmathur | github.com/sidhantmathur | sidhantmathur.com

## SUMMARY

Sales operations specialist with 5 years at Nokia, owning the reporting and tooling for a 7-region, $10B+ pipeline sales organization: incentives, quarter-end close and weekly operating review. Co-founder and sole developer of A Darle 20, a marketplace with 2,100+ users. Builds with whatever the job needs, from Power BI and Salesforce to Next.js and Supabase.

## EXPERIENCE

**Nokia** — Ottawa & Toronto, ON (Remote)

**Sales Operations Specialist** — Jun 2024 – Present

- Built the weekly operating review tool that regional sales ops teams use to compile the Chief Customer Officer's weekly report, merging CRM data with standardized self-serve updates in place of ad hoc email and slides; shipped in two weeks.
- Launched the self-serve Power App behind quarter-end executive reporting for 80+ stakeholders across 7 regions, replacing an error-prone, full-day manual consolidation, so close reporting no longer waits on one analyst.
- Inherited and extended the Power App and automations that North America runs all its reviews on; 30 core users.
- Run monthly and quarterly sales incentive calculations for 900+ staff; cut steps and manual checks from the automation.
- Delivered Salesforce CRM Analytics dashboards for exec reviews (150+ monthly users), then moved reporting to Power BI.
- Built Power BI reports for 5 teams outside the sales org and maintain the automation that keeps them refreshed.
- Building an AI agent (Power BI, Glean, Teams) that flags pipeline gaps vs. prior years, conflicting fields and past-due dates.

**Workforce Management Specialist** — Oct 2021 – Jun 2024

- Ran the monthly headcount forecast process (~70% of budget), planning and requisitions for a 3,000–4,000-person org.
- Automated input checks for the monthly headcount forecast with VBA, saving ~5 hours a week of manual review.
- Inherited and ran the SharePoint home site for 3,000–4,000 people and helped teams set up their own sites.
- Led a lab and facility utilization analysis that identified $1.2M in real-estate cost savings.

**A Darle 20 ("Let's Go 20") — adarle20.com** — Puebla, Mexico (Remote)

**Co-Founder & CTO (part-time)** — Aug 2025 – Present · launched Mar 2026

*Stack: Next.js, React, TypeScript, Supabase (PostgreSQL), Stripe Connect, Vercel, PostHog, Resend*

- Built the platform as sole developer using AI-native workflows, owning architecture, code review and release.
- Reached 2,100+ users, 110+ hosts and 3,600+ session reservations from 1,000+ players.
- Instrumented the funnel (conversion, refunds, host activation); data steered growth to word of mouth over paid ads.
- Ran the technology behind a flagship 251-player event at a 19,000-attendee convention, rated 4.96/5 by attendees.

**Freelance Web Development & Consulting** — Remote

**Self-employed** — May 2019 – Oct 2021

- Built client sites, including an affiliate-marketing site and consultation booking for a fashion consultant's team.

**Immosis LLC** — Dallas, TX (Remote)

**Digital Marketing/Web Developer (part-time)** — Mar 2018 – Aug 2018

- Developed the company's VR course platform: video playback, uploads, user accounts and Stripe subscription payments.
- Designed the data model and admin panel so the team could manage courses without a developer.

**Dell Technologies** — Round Rock, TX

**Marketing Intern** — May 2018 – Aug 2018

- Built an Azure ML propensity model that found ~20,000 cross-sell accounts (~$129M at the segment's average deal size).
- Trained the sales and marketing teams to use the model's output for lead prioritization.

## EDUCATION

B.S. in Business Administration — The University of Texas at Dallas — 2016 – 2019

*Placed 3rd of 150+ in a sales competition pitching to local sales managers*

Software Engineering Immersive — General Assembly, Toronto — Sep 2020 – Jan 2021

## SKILLS

**RevOps Systems & Analytics:** Salesforce (CRM Analytics), Power BI, DAX, Power Apps / Power Automate, SharePoint, Excel/VBA
**Sales Operations:** Sales compensation, forecasting, pipeline and quarter-end reporting, CRM data quality, process automation
**AI:** Claude Code, Codex, LLM APIs (Anthropic, OpenAI, OpenRouter), Glean, Copilot Studio
**Software Engineering:** JavaScript, TypeScript, Python, SQL, React, Next.js, Node.js, PostgreSQL, Supabase, REST APIs, Git, HTML/CSS
**Interests:** building with AI, pickup basketball, classic and horror fiction, Canadian AI and housing policy
**Canadian Citizen**
